

Replacing the Impeller

Using your thumbs press **FIRMLY** on the impeller module to remove the entire unit.

Press only **the sides of the new impeller** when installing to avoid damaging the precision hub bearing.

Insert the impeller so that the side that has a small triangle (close to the perimeter) faces the front of the Kestrel when installed. Orient one "arm" straight up (fig.1 & fig.2). The impeller can be pushed in from either side.

fig.1 Kestrel
1000 - 3550

fig.2 Kestrel
5000-5700

California Proposition 65 Warning

WARNING: This product and/or its included or branded accessories can expose you to chemicals, including lead and lead compounds, which are known to the State of California to cause cancer and bisphenol A (BPA), and phthalates DINP and/or DEHP, which are known to the State of California to cause birth defects or other reproductive harm. For more information, go to www.P65Warnings.ca.gov. You may also visit www.nksports.com/prop65 for a more in-depth statement regarding Proposition 65 as it relates to Kestrel's manufacturing processes and products.

Many of the elements listed under Proposition 65 are commonly found in products in the electronics industry. Although Kestrel Instruments' manufacturing process is "lead-free," it remains possible that small amounts of lead could be found components or subassemblies. Bisphenol A (BPSA) could be found in plastic housings, lenses, labels or adhesives, and DEHP & DINP (phthalates) could be found in PVC wire coatings of cables, housings, carrying cases, an/or power cords. Because we cannot guarantee that these chemicals are never present, we have elected to place the warning on our products to ensure compliance with California law and our customers' right to know. While we have not attempted to evaluate exposure, we believe that normal consumer use of this product is unlikely to result in exposure that creates a significant risk of harm. For more information visit www.nksports.com/prop65 or contact us directly at techsupport@nkhome.com.
