

# BHT-2

## Advanced Baler-Mounted Hay Moisture Tester

Part No. 07160

**New multi-sensor technology takes readings on the left and right side, as well as through the bale, for greater accuracy.**

### Features:

- Bale type: small square bales and round bales
- Large backlit display for night use
- Average of readings updated and displayed every 2 to 3 seconds
- Illuminated keypad and text display
- $\pm$  Moisture offset adjustments
- User can set the high and low limit of the moisture reading
- Firmware/calibration curves upgradable via standard USB port

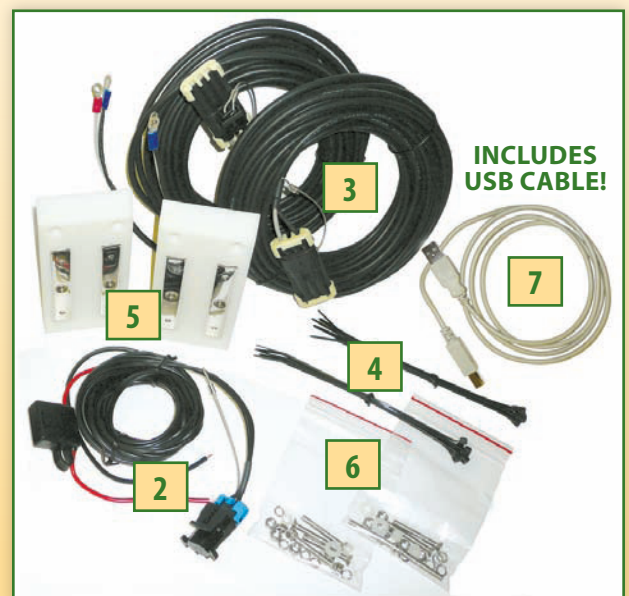

### DURING BALING

### SPECIFICATIONS

|                           |  |
|---------------------------|--|
| <b>Moisture Range</b>     | 8% to 40% depending on baler type used             |
| <b>Accuracy</b>           | Accurate throughout the normal range of stored hay |
| <b>Display Resolution</b> | 0.1% moisture                                      |

### Product Includes:

- 1 Display module with mounting bracket attached by two knobs
  - 2 10' fused power cable
  - 3 Two 35' shielded sensor cables
  - 4 Twelve sensor cable ties
  - 5 Two sensor pads
  - 6 Sensor pad mounting hardware
  - 7 One USB cable
- Complete installation instructions
